the race to global consciousness in a world in crisis Our world is changing faster than anyone predicted. Already, freshwater supplies are shrinking, agricultural yields are dropping, our forests are burning, and rising oceans are more acidic—all, in part, due to a warming climate. As our natural world changes around us, so does our way of life. Coastal
home values drop as insurance premiums rise; drought reduces feed for American farmers... World Coal 2018-2050:
